WEST COAST  
COMPUTER FAIRE**

*A Conference & Exposition  
on  
Personal & Home Computers*

**PROGRAM**

**april 15-17, 1977 • san francisco**

©77-1-10 by Computer Faire

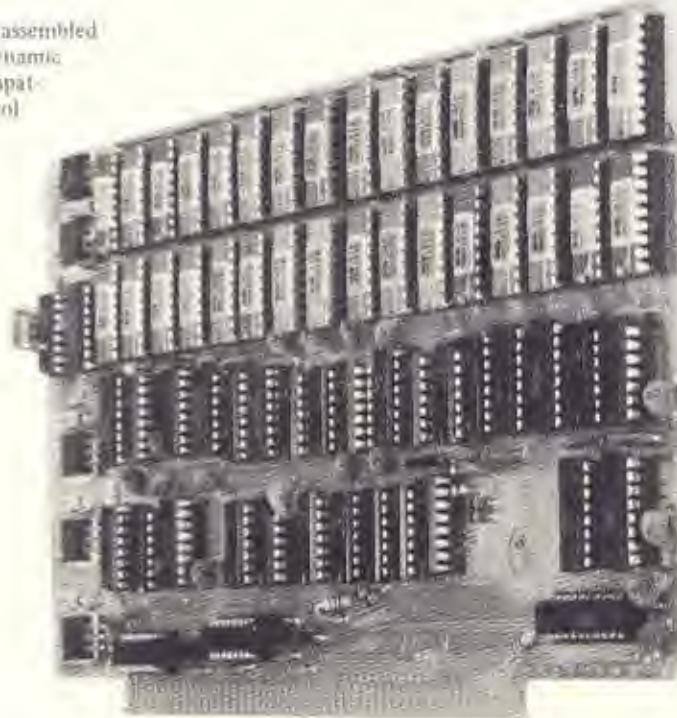

BOX 1579, PALO ALTO CA 94302 □ (415) 851-7664

# 16384 BYTES for \$485.00

assembled (with sockets) : tested - burned-in - guaranteed

A new high in S100 bus memory cost effectiveness. Fully assembled (with sockets), tested, burned-in and guaranteed, 4Kx1 dynamic memory chips (the same ones used by the ton in IBM compatible memory systems) combined with self contained control logic, yield a memory system with these features:

- Low power consumption, total board 5 watts.
- Transparent refresh, which means the memory looks static to the outside world.
- No waiting. In fact, XRDY is not even connected to the memory.
- Full DMA capability.
- Reliable, low level clock and control signals.
- Three full days testing at 70° C (185° F).

## BOOTH 200 & 301

### SPECIFICATIONS

Capacity:	16384 bytes
Addressing:	16K boundaries
Bus structure:	S100 - Plug compatible with IMSAI 8080, POLY 88, ALTAIR 8800, BYTE-8, SOL
Address and Data Buffering:	<200 uA, special high impedance buffers - less than one low power Schottky load
Access time:	350 nSec
Memory chips:	MM 5271 (National Semiconductor and others) 4K dynamic

## Dynabyte

**Dynabyte®**

brings to the S100 Bus a state of the art, industrial quality memory system.  
16K on a single board for \$485.00. Guaranteed for 1 year.

**PRIZES CONTRIBUTED BY EXHIBITORS**  
*(as of 4:10 a.m. on 77 April 7)*

The following products have been donated by the indicated vendors to be awarded for the best homebrew exhibits, and to be given away as door prizes at the Faire banquets, and convention, (as of April 2nd).

Announcements of the winners of each prize will be posted at the contributor's booth, and will also be mailed to the winner. Drawings for the door prizes will take place throughout the Faire, and the winners need not be present to win.

COMPANY	QUANTITY	PRODUCTS	RETAIL VALUE
Midwest Scientific Instruments Inc.	1	MSI FD-8 Floppy Disk System, complete with MSI Disk BASIC & FDOS Operating System	\$1500.00
Parasitic Engineering & Morrow's Micro Stuff	1	EQUINOX 100 Computer Kit	\$ 599.00
	1	Power Supply Kit (customers choice for either the Altair 8800 or an Equinox 100 power supply)	90.00
	5	Clock Fix Kits for the Altair 8800 (\$15@)	75.00
	1	Xitan Alpha I System (kit)	\$ 769.00
Technical Design Labs Inc.	1	SB-1 Synthesizer Board for the S-100 Buss	\$ 250.00
Cybercom/Solid State Music	1	VB-1A Video Interface for the S-100 Buss	189.95
	5	XB1 Kit (\$12.50@)	62.50
Southwest Technical Products	1	GT-64 Terminal with matching monitor	\$ 495.00
Computalker Consultants	1	Model CT-1 Speech Synthesizer Board	\$ 395.00
XIMEDIA Corporation	5	DAE Tape Readers (\$75@)	\$ 375.00
North Star Computers, Inc.	1	Hardware Floating Point Board Kit, including Compatible version of North Star BASIC.	\$ 359.00
GIMIX, Inc.	10	Gimix Gobblers (\$30@)	\$ 300.00
MINITERM Associates	1	MERLIN Video Interface Kit	\$ 269.00
ROM: Computer Applications For Living	2	Lifetime subscriptions to ROM: Computer Applications for Living (\$250.00@)	\$ 500.00
VECTOR Graphic, Inc.	5	Motherboards (\$49@)	\$ 245.00
Polymorphic Systems	1	Video Terminal Interface Kit	\$ 210.00
MINI-MICRO Systems Magazine	4	CORVUS Slide Rule Calculator (\$50@)	\$ 200.00
MECA	1	MECADRIVE	\$ 200.00
Godbout Electronics	1	BASIC RAM kit (use with "JOLT", etc.) 4kx8	\$ 88.00
	1	ECONORAM Kit (use with Altair/Imsai S-100)	99.95
Smoke Signal Broadcasting	1	P-38 8K EPROM Board	\$ 179.00
Hayden Book Company, Inc.	10	BASIC BASIC (\$7.95@)	\$ 79.50
	10	Microprocessor BASICS (\$9.95@)	99.50
Tarbell Electronics	1	Tarbell Cassette Interface Kit	\$ 120.00
	2	Tarbell Prototype Boards (\$28@)	56.00
BYTE Publications Inc.	1	Lifetime subscription to BYTE magazine.	\$ 150.00
Component Sales, Inc.	1	Burroughs SELF-SCAN	\$ 150.00
IASIS, Inc.	1	Microcomputer Design Course (6 volumes)	\$ 99.50
Jade Company	5	Microcomputer Applications Handbooks (\$7.95@)	39.75
	2	2708 (8K E-PROM) (\$40@)	\$ 80.00
Scientific Research	16	2107B-4 (4k Dynamic RAM) (\$3.625@)	58.00
Technical Systems Consultants	1	Set of all 5 volumes of BASIC Software library	\$ 109.75
	1	TSC Text Editing System-6800	\$ 23.50
	1	TSC Micro Basic Plus-6800	15.95
Oliver Audio Engineering Inc.	1 ea.	Package I for 1)6800, - 2)6502, - 3)8080 (\$20@)	60.00
Digital Research	1	OP-80A Paper Tape Reader Kit	\$ 74.50
Logical Services Inc.	1	CP/M System Diskette & Documentation	\$ 70.00
PAIA Electronics Inc.	1	Modu-Learn Microcomputer Software Course	\$ 49.95
PMS Publishing Company	1	8780 Equally tempered D/A (for music)	\$ 34.95
Sunset Technologies	5	The Underground Buying Guide (\$5.95@)	\$ 29.75
Creative Computing	1	Gift Certificate	\$ 25.00
	1	The Best of Creative Computing, Vol.II	\$ 8.95
	1	101 BASIC Computer Games	7.50

**Prize Contribution Update as of 4:10 a.m. on 77 April 7**

Dymax	12	1-year subs to <i>Calculators/Computers Magazine</i> (\$12@)	\$144.00
Parsec Electronics	1	Main board & keyboard enclosures for SWTPC 6800 m-p	\$ 49.95
	1	Printer cover for SWTPC PR-40 Printer	\$ 14.95
Pfeiffer, E & L	10	Hexadaisy Hexadecimal Sliderules (\$3.95@)	\$ 39.50

# CP/M

## LOW-COST MICROCOMPUTER SOFTWARE

CP/M is a low-cost control program for microcomputers which brings together recent advances in computer and peripheral technology. CP/M is an advanced disk operating system designed for use with IBM-compatible diskette-based computer systems which employ the Intel 8080 microcomputer. Previously available only to OEM's, CP/M has been in existence for over three years in various manufacturers' products, and has undergone extensive field testing. The functions of this software package include named dynamic files, program editing, assembly, debugging, batch processing, and instantaneous program loading, resulting in facilities similar to popular timesharing services. CP/M is an "unbundled" software package which can be easily adapted to any 8080 or Z-80 computer system with at least 16K of main memory and one or two IBM-compatible disk drives. The field-modification manual provided with CP/M has been used successfully by many CP/M users in customizing CP/M for their own hardware configurations.

## II DIGITAL RESEARCH

Please send me the following:

- CP/M Documentation** (Complete set of 6 manuals) for **\$25.00**.
- CP/M Documentation and CP/M System Diskette** for **\$70.00**.
- Free CP/M brochure and price list.**
- Information** concerning high level languages and optional packages.

**NOTE:** IMS Associates and Digital Systems distribute CP/M with their hardware systems.

**COMPUTER FAIRE DISCOUNTS  
OFFERED BY FAIRE EXHIBITORS**  
(as of 5:45 a.m. on 77 April 7)

(Discounts for which the Faire has written commitments, as of April 2nd).

COMPANY	DISCOUNTS BEING OFFERED
MECA	20% discount on all products purchased at the Faire.
Parasitic Engineering & Morrow's Micro Stuff	20% discount on Deluxe Hardware kit if purchased with an EQUINOX-100 Computer Kit.
Smoke Signal Broadcasting	Clock Fix kit for Altair 8800 for \$5.00 with any other purchase. \$25.00 discount allowed on items priced over \$150.00 ordered or purchased at the Faire. In addition, will be giving away "inflated" wooden nickels worth \$5.00 on the purchase of any item. (Limit- 1 per customer.)
XIMEDIA Corporation	12% discount on all our products purchased at the Faire. IMSAI I-8080 with TDL ZPU Card (instead of 8080) Cooling fan, 22 slot motherboard with 22 pre-soldered Connectors, 44 card guides, \$899 Kit or, \$1295 assembled
Cybercom/Solid State Music	SB-1 Synthesizer board for the S-100 bus. Retail: \$250 Faire Discount: \$220
Realistic Controls Corporation	RCC Z/25 FORTRAN IV-MINIFLOPPY Kit. Retail: \$1095 Discount: \$995
Computalker Consultants	10% discount on all items purchased at the Faire.
Digital Research	10% discount on all CP/M documentation purchased at the Faire.
Logical Services, Inc.	10% discount on all products purchased at the Faire.
Midwest Scientific Instruments Inc.	10% discount on all products purchased at the Faire.
MINITERM Associates	10% discount on all products purchased at the Faire.
SAC Sales Group	10% discount on all products ordered at the Faire.
Sunset Technologies	10% discount on all products purchased at the Faire.
VECTOR Graphic Inc.	10% discount on all products purchased at the Faire.
Video Terminal Technology	10% discount on all products purchased at the Faire.
Scientific Research	10% discount on purchases of complete sets of the 5 volumes of BASIC software library.
EXTENSY Corporation	6% discount on all products purchased at the Faire.
Computer Magazine (IEEE Computer Society)	Computer Society Publications offered at member discount prices.
ROM: Computer Applications For Living	Premier issue of ROM free with subscription purchased at the Faire. This is a Faire exclusive.
Creative Computing	Extra issue of Creative Computing free to subscribers and renewers. Discounts on purchasing 3 or more Creative Computing books.
Discount Update as of 4:10 a.m. on 77 April 7	
Advanced Technology Research Assoc.	Blinkies (multi-faceted LED pendants. Retail: \$39.99. Faire Discount: \$29.95.
Board Byters	10% discount on all products purchased at the Faire.
Dymax	50% discount on cash orders for \$500 or more, for any combination of the following books: <i>Instant BASIC</i> , <i>Your Home Computer</i> , <i>My Computer Likes Me</i> , <i>Games with the Pocket Calculator</i> , <i>Games, Tricks, &amp; Puzzles for a Hand Calculator</i> .
Gnomon Associates	15% discount on all products purchased at the Faire.
Hal Communications Corp.	Gnomon Cassette Controller. Retail: \$69.95. Faire Discount: \$59.46.
Bell & Howell Schools	5% discount on all products purchased at the Faire.
Integrand Research Corp.	10% discount on all products purchased at the Faire.
National Semiconductor Corp.	20% discount on cabinet for computer terminal (TVT-2)
Parsec Electronics	10% discount on all products purchased at the Faire.
Pfeiffer, E & L	30% discount on m-p product literature packages
R.D.C. Enterprises	Free SC/MP or PACE m-p chip given with purchase of SC/MP or PACE literature package
Vandenberg Data Products	15% discount on all products purchased at the Faire.
	Hexadaisy Hexadecimal Slide rule. Retail: \$3.95 + tax. Discount: \$3.75 (incl. tax).
	30% discount on all products purchased at the Faire.
	Compu/Time CT100 Kit. Retail: \$195. Faire Discount: \$150.
	C101. Retail: \$147. Faire Discount: \$115.
	T102. Retail: \$160. Faire Discount: \$125.
	Vandenberg Data Products 16K Memory kit for S-100 bus. Retail: \$385. Faire Discount: \$308 (plus tax and shipping)

# Meet the most powerful μC system available for dedicated work.

## Yet it's only \$595.\*

\*kit price

Here's the muscle you've been telling us you wanted: a powerful Cromemco microcomputer in a style and price range ideal for your dedicated computer jobs—ideal for industrial, business, instrumentation and similar applications.

It's the new Cromemco Z-2 Computer System. Here's some of what you get in the Z-2 for only \$595:

- The industry's fastest  $\mu$ P board (Cromemco's highly regarded 4 MHz, 250-nanosecond cycle-time board).
- The power and convenience of the well-known Z-80  $\mu$ P.
- A power supply you won't believe 1+8V @ 30A, +18V and -18V @ 15A — ample power for additional peripherals such as floppy disk drives).
- A full-length shielded motherboard with 21 card slots.
- Power-on-jump circuitry to begin automatic program execution when power is turned on.
- S-100 bus.
- Standard rack-mount style construction.
- All-metal chassis and dust case.
- 110- or 220-volt operation.

### DEDICATED APPLICATIONS

The new Z-2 is specifically designed as a powerful but economical dedicated computer for systems work. Notice that the front panel is entirely free of controls or switches of any kind. That makes the Z-2 virtually tamper-proof. No accidental program changes or surprise memory erasures.

### FASTEST, MOST POWERFUL $\mu$ C

Cromemco's microcomputers are the fastest and most powerful available. They use the Z-80 microprocessor which is

widely regarded as the standard of the future. So you're in the technical fore with the Z-2.

### BROAD SOFTWARE/PERIPHERALS SUPPORT

Since the Z-2 uses the Z-80, your present 8080 software can be used with the Z-2. Also, Cromemco offers broad software support including a monitor, assembler, and a BASIC interpreter.

The Z-2 uses the S-100 bus which is supported by the peripherals of dozens of manufacturers. Naturally, all Cromemco peripherals such as our 7-channel A/D and D/A converter, our well-known BYTESAVER with its built-in PROM programmer, our color graphics interface, etc., will also plug into the S-100 bus.

### LOW, LOW PRICE

You'll be impressed with the Z-2's low price, technical excellence and quality. So see it right away at your computer store—or order directly from the factory.

**Z-2 COMPUTER SYSTEM KIT (MODEL Z-2K)** (includes 4 MHz  $\mu$ P card, full-length 21-card-slot motherboard, power supply, one card socket and card-guide set, and front panel; for rack mounting) . . . \$595.

**Z-2 COMPUTER SYSTEM ASSEMBLED (MODEL Z-2W)** (includes the above as well as all 21 sockets and card guides and a cooling fan; for rack mounting) . . . \$995.

Shown with  
optional bench cabinet

# CT-64 TERMINAL SYSTEM

- 64 OR 32 CHARACTERS PER LINE
- UPPER AND lower case LETTERS
- FULL 8 BIT MEMORY
- 128 CHARACTER ASCII SET
- 110/220 Volt 50-60 Hz POWER SUPPLY
- SCROLLING OR PAGE MODE OPERATION
- CONTROL CHARACTER DECODING-32 COMBINATION
- PRINTS CONTROL CHARACTERS
- USABLE WITH ANY 8 BIT ASCII COMPUTER
- REVERSED BACKGROUND - **HIGHLIGHTING**

**COMPLETE WITH** — Chassis and cover, cursor control, 110-1200 Baud serial interface and keyboard. Optional monitor shown in photo available.

Now you can buy it. The terminal that has all the features that people have been asking us to include. The CT-64 has all the functions that you could want in a terminal and they may be operated by either switches, or through a software program.

All cursor movements, home-up and erase, erase to end of line, erase to end of frame, read-on, read-off, cursor on, cursor off, screen reversal, scroll, no scroll, solid cursor, blinking cursor, page selection and a beeper to warn you of end of page; all are provided for your use in the CT-64.

You may also switch from upper-case only teletype style operation to upper-lower case typewriter style operation. You can reverse the field on individual words to highlight them, or you can reverse the whole screen.

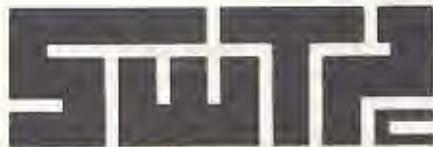

CT-64 is complete with keyboard, power supply serial interface and case. A matching 9 inch monitor with coordinated covers is also available to make a complete system.

**CT-64 Terminal Kit** \$325.00

**MM-1 Monitor (assembled)** \$175.00

You are right, it's just what I have been asking for.

Mike Wilbur  
920 Dennis Drive  
Palo Alto CA 94303

*A Network of Community Information Exchanges:  
Issues and Problems***MESSAGE CENTER**

A "Messages" bulletin board is located in the Main Lobby of the Civic Auditorium. Those wishing to do so may post 3x5 notes on this board in the indicated locations to:

- \* establish contact with someone
- \* obtain rides or riders
- \* share accommodations ("crash pads"?)
- \* buy or sell used equipment owned by private parties

**EMPLOYMENT EXCHANGE**

An employment bulletin board is located in the Main Lobby of the Civic Auditorium. Those seeking employees or employment may post a 3x5 card indicating their desires or capabilities.

# TSC's

# MULTI-USER SYSTEM

## BOOTH 114

Would you believe: 4 1200 baud terminals,  
7 different programs, all running at  
the same time, on a SWTPC 6800?

Seeing is believing! Stop by TSC's booth, #114.

### \*\*\* SPECIAL ATTRACTION \*\*\*

TSC will demonstrate 4-user Micro BASIC Plus  
at various times throughout the show!

## COMPUTER MUSIC WITH OR WITHOUT THE COMPUTER!

### EQUALLY TEMPERED DIGITAL TO ANALOG CONVERTER

The PAIA 8780 kit is based on a multiplying principle that allows the module to generate the exact exponential stair-step function required to make even the simplest linear response oscillators and filters produce equally tempered musical intervals. The 8780 uses only six bits of data to generate over 5 octaves of control voltage. In an 8 bit system the remaining two bits are ordinarily reserved for trigger flags, but may be used to extend the range of the converter or provide micro-tonal tunings.

The module is physically and electrically compatible with the complete line of PAIA music synthesizer modules and is easily interfaced to any micro-processor with or without hand-shaking logic.

#8780 D/A CONVERTER Kit ..... \$34.95  
(plus \$1.00 postage)

### WITH A COMPUTER

Both the 8780 D/A and the 8782 Encoded Keyboard easily interface to any processor providing capabilities and control never before possible with music synthesizers.

DETAILS  
ON THESE & MORE  
IN OUR FREE CATALOG

**PAIA**  
ELECTRONICS, INC.

### THE PAIA HIGH LEVEL LANGUAGE FOR COMPUTER MUSIC DATA ENTRY (We call it a keyboard)

An n key roll-over scanning matrix encoder tied to a 37 note AGO keyboard provides 6 bits of data and both STROBE and STROBE control outputs. Input control lines to the encoder include SCAN (starts and stops encoder clock), RESET, START and RANDOM making the keyboard universally applicable to all computer/processors from the very largest to the very smallest.

Housed in a trim and sturdy vinyl covered road case, the kit consists of all parts including keyboard, power supply and detailed assembly instructions; software overview for computer applications and detailed instructions for Digital Sample and Hold.

#8782 ENCODED KEYBOARD .. \$109.95  
(shipping wt. 20 lbs. -  
shipped freight collect)

### WITHOUT A COMPUTER

An infinite hold, DIGITAL Sample and Hold and the heart of an entire system of modules that will be introduced over the next few months including: Memories, Polytonic output modules & others.

# Your microcomputer is only as good as its memory

Your micro-computer is... in a manner of speaking... capable of thinking. The amount of information you can store, combined with the access speed, determines the bottom line capability of your microcomputer.

The Midwest Scientific Instruments' FD-8 Floppy Disk Memory System will enable you to get the most out of your microcomputer. . 6800 or 8080. We have the most complete 6800 disk operating system available today, which interfaces to any microcomputer via a single PIA chip.

When used with the MSI FDOS Operating System, included with purchase, the FD-8 gives your microcomputer a level of performance which can only be matched by larger computers.

You can have program save and load with named, variable length, password protected files at three levels: object code files, source code files, and BASIC files.

It has disk routines which can be used easily by

low level assembler language programs as well as high level BASIC programs.

The coresident assembler/editor saves and loads source files from disk, assembles and stores object code on disk, and creates assembly listings on a high speed printer.

You get a full ANSI standard BASIC interpreter\* with program load and save, from disk as well as tape, with both random and sequential disk data files. BASIC also has multi-I/O port capability under software control.

And all you need do to access any of these functions is type the appropriate commands on your terminal.

The FD-8 is complete, including all power supplies, cabinet, cables, software, manuals, and documentation.

You can order the FD-8 as a kit for \$1,150.00, or wired and tested for \$1,395.00.

Visit one of our dealers for a demonstration, or send for our free Catalog of MSI products.

## PRAMMER

by XYBEK

An extraordinary 2k memory board  
 for your Altair-bussed computer

- ★ On-board 1702A PROM programmer
- ★ Space for 1792 bytes of read-only memory (seven 1702A EPROMs)
- ★ 256 bytes of RAM
- ★ Supplied with one 1702A, pre-programmed with stand-alone programming software — no sense switches are used
- ★ Supplied with programming power supply
- ★ PRAMMER's own on-board clock makes it compatible with almost any Altair-bussed system
- ★ All read and write sequences are generated via an on-board micro-programmed state machine, thus eliminating all one-shots
- ★ Complete 1702A programming in 18 seconds

COMPLETE KIT: ..... \$209

(\$189 through June 14, 1977)

Assembled and tested: ..... \$289

Immediate (off-the-shelf) delivery

California residents please add sales tax.

Master Charge and Bank Americard accepted.

XYBEK • P.O. Box 4925 • Stanford, CA 94305

## IMSAI Introduces the Megabyte Micro.<sup>TM</sup>

### The Megabyte Memory

Until today, the largest memory you could fit and address in a single microcomputer CPU was 65K.

Now, IMSAI presents an incredible memory system for micros 16 times more powerful than yesterday's best.

Imagine, a full megabyte of power from sixteen 65K RAM boards.

And, to control all this, the IMSAI Intelligent Memory Manager (IMM), the super control board.

You can write protect blocks throughout the full megabyte. Or, map in 16K blocks.

Plus, preset 16 mapping configurations with protect for high speed transfer or rapid change.

All interrupts are fully vectored, and there's an interrupt if an attempt is made to write into protected memory.

There's even a real "time of day" clock.

### 65K, 32K and 16K RAM Boards

Until today, the most memory you could plug into a single slot was 16K.

Now, IMSAI presents memory boards in astonishing multiples of sixteen: 65K, 32K, and 16K low power, dynamic RAM Boards. They can be used in any S-100 bus computer individually or in combination to form conventional systems up to 65K bytes.

Every board is fast. With "hidden refresh" and no "wait state".

### The Complete Megabyte Microcomputer System

IMSAI is much more than a megabyte memory. It's a complete microcomputer system, dual floppy disks, terminals, plotters, printers.

IMSAI is also software. The finest peripherals and high level software available. Paper tape, Tape Cassette, and super-Disk Operating Systems. Plus, BASIC and Disk BASIC with more high level languages coming.

Until today, the microcomputer's potential was just something you talked about.

Now, you can put it to work. Powerfully.

# The first complete small computer.

As you thumb through this magazine, you'll see a lot of ads for small computers. For \$600 you can find a pretty good box with a power supply, four slot mother board, CPU module, and all the expected lights and switches.

But you know what? It won't work.

That's because in order to make the computer go you have to buy memory—normally both read-write (RAM) and read-only (PROM), interfaces to the outside world (parallel, serial, and cassette), keyboard, video display module, and software.

Add this all up and it's going to cost you at least \$1,400 for a complete system.

Got the picture?

Now listen to this. The remarkable new Sol-20 Terminal Computer will give you all of the above...plus more!...as standard equipment for just \$995, in kit form. This is because the Sol-20—like no other small computer—was designed from the ground up to be complete.

Here's what the Sol-20 includes as standard equipment:

- 8080 microprocessor.
- Video display circuitry.
- 1024 words of static, low-power RAM.
- 512 words of preprogrammed PROM.
- Custom 85-key solid-state keyboard.
- Audio cassette tape interface.
- Both parallel and serial interfaces and connectors.
- Power supply.
- A beautiful case with solid walnut sides.
- Software that includes a preprogrammed PROM personality module and a cassette with BASIC-5 language plus two sophisticated computer video games.
- Full expansion capability with all S-100 bus (Altair/IMSAI/PTC bus) products.

It's a handsome terminal or computer that will even look good in your living room or office. Small systems start at just \$475.

#### Full expansion capability

The Sol-20 system can be tailored to your applications using the complete line of peripheral products from Processor Technology. These include the video monitor, audio cassette and digital tape systems, dual floppy disc system, memories, and interfaces...plus all other peripherals compatible with the S-100 bus.

The Sol-20 greatly simplifies the computer-buying process. It's a splendid package that will excite both present and prospective computer owners.

Our brochure tells all. Write for it today.

Processor Technology, Box Z,  
6200 Hollis Street, Emeryville, CA 94608.

GEE, YOU WOULDN'T BELIEVE HOW MANY PEOPLE I HAVE TO TELL TO KEEP THEIR HANDS OFF MY ASP SINCE I BEGAN WEARING THE OFFICIAL FIRST WEST COAST COMPUTER FAIRE T-SHIRT!!

## SHOW what you KNOW!!

Whether you're in the barroom or the boardroom, you may rest assured that The Official First West Coast Computer Faire T-Shirt is the attire for the Computer Faire! It will bring to you sartorial splendor. This ivy-color T-Shirt (tops o' the stack, too!) by the vest, up & running orange will amaze your friends, restore hair, and prevent bullies from kicking sand in your face. If your friends are gullible, your alopecia was temporary, and you avoid beaches.

On the other hand, who cares?

In separate laboratory tests, Dr. Seymour Squintz (who was born outside of a log cabin in the Goya Strip) stated: "When I go down to the beach of life [in my Official First West Coast Computer Faire T-Shirt], they may still kick sand in my mind's eye, but I see it in close for the growth of a pearl rather than for the use of Vaseline."

The fact that Dr. Squintz subsequently and tragically incurred major catastrophe, subsequently dying, he was an ardent voyeur, and accidentally committed reverse self-determination, is, of course, unfortunate. And we will probably stop using his testimonial.

In the meantime, whether you're a shareholder or a sharecropper, sit the board of directors or simply bored of directors, buy a gross of these discreet garments, and beat them proudly. Equally at home under a motorcycle jacket or a Brooks Brothers, the Computer Faire T-Shirt will positively make you look strong. Or maybe slumped.

In any case, keeping in mind that you are what you wear, and that, though this T-Shirt may be taken to the cleaners, you never will be, we think you will agree that the proposed investment of \$4 a shirt is modest, at least compared to this solicitation.

So, order generously. For as we say, you shall reap.

AFTER WEARING THIS  
T-SHIRT, THEY BANNED  
DATA BUSING IN BOSTON.

(Please note: Because this is a limited edition, Officials from the Framers' Mill will, at an un-specified time, unroot our cotton plants, shred our silkstream, and set our copywriter adrift in a small raft, blindfolded, in downtown Billings, Montana.)

If you want to Act Now!, contact the Actors' Guild. If you thereby want to set the stage, have they the Computer Faire T-Shirt.

YES! Send to me immediately (as ordered) The Official First West Coast Computer Faire T-Shirt(s). I understand they are additionally fabulous for their unique property of both cradling the wearer, and swaddling bystanders—innocent and guilty alike—with exquisite envy. (So that Computer Faire may prepare legal defense for actionable horripilatory incitement, please indicate your first intended bystander:

Yves St Laurent,  EE professor who flunked me,  boss,  janitor,  janitor's tax accountant,  maître d' at MacDonald's,  cat,  computer club executive council,  tech rep,  cheeky proctologist,  \_\_\_\_\_

## AMERICAN MICROPROCESSORS EQUIPMENT & SUPPLY CORP.

THE NATION'S MOST INFORMATIVE, WELL SUPPLIED COMPUTER STORE OUTLET WITH AMAZING VALUES!

- Automatic answer modem. Allows KISS System to automatically answer incoming telephone calls from remote terminals or computers. Remote terminals & devices use KISS as if they were connected directly. Password protection for programs, associated files, list protection and additional system security features are also provided.

OVER 100 KISS SYSTEMS SOLD...

OVER 21 MODELS TO SELECT FROM

TO MEET YOUR NEEDS!!!

### KISS SYSTEM 70 includes

- KISS complete computer system with 32K memory, automatic monitor and interconnections to operate the following:
- Heavy duty general office or industrial Keyboard & Display unit with keys for all letters, numbers and special letters needed with separate numeric entry keypad and many other features.
- Dual Floppy disc system & controller with dual DOS and 600,000 Bytes of random access storage (expandable to 4 floppies).
- Printer with 132 columns, upper case & lower case letters, carbon or fabric ribbon, multiple type styles, conventional solid print, (keyboard is low cost option).
- Dual cassette controller.
- 12K Basic language.
- Coresident editor/assembler.
- Full disc files capabilities.
- Several self-teaching business programs including many games.
- Thorough documentation.
- Diagnostics.
- Custom computer table.

## The magazine that actually tells you what to do with your personal computer

ROM is the magazine that helps you use your personal computer. Computer games are lots of fun, but there's another whole big world out there. Computer-controlled environments from bathrooms to greenhouses, solar home energy, semirobotic servomechanisms— even the real robots you'll find them all in ROM.

There's computer aid for the handicapped, instant video home news, voice control that really talks, practical software you can use right now, graphics, puzzles—yes, games too. And lots more every month.

ROM opens the door with simple solutions to complicated problems, the best in new peripherals, and great ideas on what to do with it all from Bill Etra, Lee Felsenstein, Avery Johnson, Theodor Nelson, Frederik Pohl, Andrew Singer, Alvin Toffler, Joseph Weizenbaum, Hesh Wiener, and the rest of the top writers in the field.

## Coming Up in ROM

- Why Can't a Computer Be More Like a Man?
- Sheltering Your Computer in Style
- Inside Intel
- Diary of a Distaff Designer
- Micros Hit Wall Street
- The Magic of Memory
- Imagining with IMSAI
- Sailing by Computer
- The Computer Diet
- Building the Tote-a-Terminal
- Play It Again, Sphere
- Fleshing Out Your Robot—Synthetic Skin and How to Make It
- Color Crunching with Cromemco
- The Magic Mystical Bulletin Board
- Adding a Third Dimension to Your CRT
- The Magic Wand Connection

ROM Publications Corporation

Route 97, Hampton, CT 06247 Tel. 203-455-9591

**FREE  
DIGITAL FOAM!**  
As a Faire special, we are giving away an expert  
menter's sample of digital foam (Dynacan "C") to  
each of the first 200 buyers of a ROM subscrip-  
tion. Come to Booth 9 early. With only 200  
samples available, they're not going to last long.

## ROM Helps

Check out where microcomputing is headed in Bill Etra's "ROMifications" column. Then find out why your machine doesn't return your tender loving care in Andrew Singer's column, "The Human Factor." You won't be able to pass up that perennial pea-in-the-Princess-Computer-Company's-mattress, Theodor Nelson, as he keeps the outfit from going to sleep with "The Missionary Position."

Other special regular features include "ROMdiscs," "ROMtutorials" (which lead the novice gently through the maze of microcomputing), "PROM-puzzles," and "FloppyROMs," not to mention lots of surprises every month. And if you have questions, or something to tell us, you get your chance regularly in the "Reader Interrupt" column.

Plus more on art, music, graphics, medicine, psychology, public access, communications—the whole big ball of wax from the future to you today in ROM.

*YES, I'll run with ROM.*

## If You Are A Rare Breed

## Electronics Buff with Retailing Moxey

## Mr. Calculator wants YOU

- If your head is into the exciting new world of microprocessing.
- If your vision reaches beyond today's horizons.
- And, if you can recognize the market potential, and enormity of growth in this rapidly awakening industry ...

### We Want You

To help us develop our present chain of electronic calculator stores into microprocessor and home brew computer centers.

#### We are at the West Coast Computer Faire, Booth 605

And we're hiring people right now to serve in North California, Southern California, Texas, Illinois and other major market areas

So, if you are the rare blend of electronics dreamer who can also taste the reality of home computer growth and has the retail marketing moxey to make it happen

#### We Want You To Join Us

***Please stop by our booth and let's talk.***

While you're at it, you can tinker with some very exciting products we presently market.

#### USA. Headquarters

### MICROCOMPUTER HANDBOOK BY CHARLES J. SIPPL

Microcomputers, tiny yet powerful and capable, have changed the characteristics of performance for all computers.

This volume serves as the basic guide to all computer users, designers and students who must learn to use these low-cost microminiaturized control devices. \$19.95

Key features include:

- Easy-to-read, non-technical prose
- Clear photos and diagrams introducing techniques and concepts
- Discussions of new software systems: ROMS, RAMS
- Latest "hobby-type" microcomputers
- Clubs, societies, manufacturers

# Complete Control.

## Introducing IMSAI 8048 Single Board Control Computer.

### Complete Control System

Intel developed the world's first single chip microcomputer. IMSAI has built the system to put it to work. Instantly!

Presenting the IMSAI Single Board Control Computer. A complete programmable computer and hardware control system on an 8" x 10" board.

Just plug in the power source (a 5V power supply or a 6V battery will do), connect the equipment you want to regulate, and you're up and running.

In complete control.

### The Chip Designed for Control

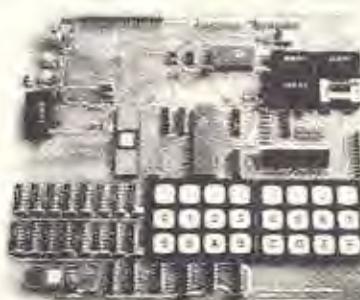

Intel designed the 8048/8748 single chip microcomputer with one thought in mind. Complete control. Everything you need is there: CPU, RAM, 1K ROM/EROM, I/O, timer, counter, interrupts...

The works.

### The Board That Implements It Instantly

You can be running hardware configurations today. Without adding a single component!

The IMSAI Control Computer is RS232 compatible, which means you can interface just about any peripheral available. There are 12 quasi-bidirectional I/O lines with handshaking, and 14 more regular I/O lines, 5 heavy duty relays, and Teletype and audio cassette interfaces. Plus, a 24 pad

hexadecimal keyboard and a 9-digit LED hex display. All on one board.

There's already an extra 1K of RAM on board, plus sockets for another 1K of RAM and 2K of ROM/EROM. Still need more memory? The IMSAI allows expansion up to 64K of RAM off board.

In short, everything you need to make tomorrow's designs today's reality. On one board!

Now, that's control.

For instant control, use the coupon provided.

### GENTLEMEN:

- Send instant control!
- Send ROM Computer Kit \$244
- Send 1404 Computer Kit \$296
- Send assembled ROM Computer \$2945
- Send assembled EROM Computer \$499
- Send W power supply \$96

## To make your computer more useful— a wide choice of memory, I/O, CPU

Your computer's usefulness depends on the capability of its CPU, memories, and I/O interfaces, right?

So here's a broad line of truly useful computer products that lets you do interesting things with your Cromemco Z-1 and Z-2 computers. And with your S-100-compatible Altairs and IMSAIs, too.

### CPU

- **Z-80 MICROPROCESSOR CARD**. The most advanced µP card available. Forms the heart of our Z-1 and Z-2 systems. Also a direct replacement for Altair/IMSAI CPUs. Has 4-MHz clock rate and the power of the Z-80 µP chip. Kit (Model ZPU-K): \$295. Assembled (Model ZPU-W): \$395.

### MEMORIES

- **16K RAM**. The fastest available. Also has bank-select feature. Kit (Model 16KZ-K): \$495. Assembled (Model 16KZ-W): \$795.
- **4K RAM**. Bank-select allows expansion to 8 banks of 64K bytes each. Kit (Model 4KZ-K): \$195. Assembled (Model 4KZ-W): \$295.
- **THE BYTESAVER**—an 8K capacity PROM card with integral pro-

grammer. Uses high-speed 2708 erasable PROMs. A must for all computers. Will load 8K BASIC into RAM in less than a second. Kit (Model BSK-K): \$145. Assembled (Model BSK-W): \$245.

- **16K CAPACITY PROM CARD**. Capacity for up to 16K of high-speed 2708 erasable PROM. Kit (Model 16KPR-K): \$145. Assembled (Model 16KPR-W): \$245.

### I/O INTERFACES

- **FAST 7-CHANNEL DIGITAL-ANALOG I/O**. Extremely useful board with 7 A/D channels and 7 D/A channels. Also one 8-bit parallel I/O channel. Kit (Model D+7A-K): \$145. Assembled (Model D+7A-W): \$245.
- **TV DAZZLER**. Color graphics interface. Lets you use color TV as full-color graphics terminal. Kit (Model CGI-K): \$215. Assembled (Model CGI-W): \$350.
- **DIGITAL INTERFACE (OUR NEW TU-ART)**. Interfaces with teletype, CRT terminals, line printers, etc. Has not one but two serial I/O ports and two 8-bit parallel I/O ports as well as 10 on-board interval timers. Kit

(Model TRT-K): \$195. Assembled (Model TRT-W): \$295.

- **JOYSTICK**. A console that lets you input physical position data with above Model D+7A/D card. For games, process control, etc. Contains speaker for sound effects. Kit (Model JS-1-K): \$65. Assembled (Model JS-1-W): \$95.

### PROFESSIONAL QUALITY

You get first-class quality with Cromemco.

Here are actual quotes from articles by independent experts: "The Cromemco boards are absolutely beautiful" . . . "The BYTESAVER is tremendous" . . . "Construction of Cromemco I/O and joystick are outstanding" . . . "Cromemco peripherals ran with no trouble whatsoever."

Everyone agrees. Cromemco is tops.

### STORES/MAIL

So count on Cromemco. Look into these Cromemco products at your store. Or order by mail from the factory.

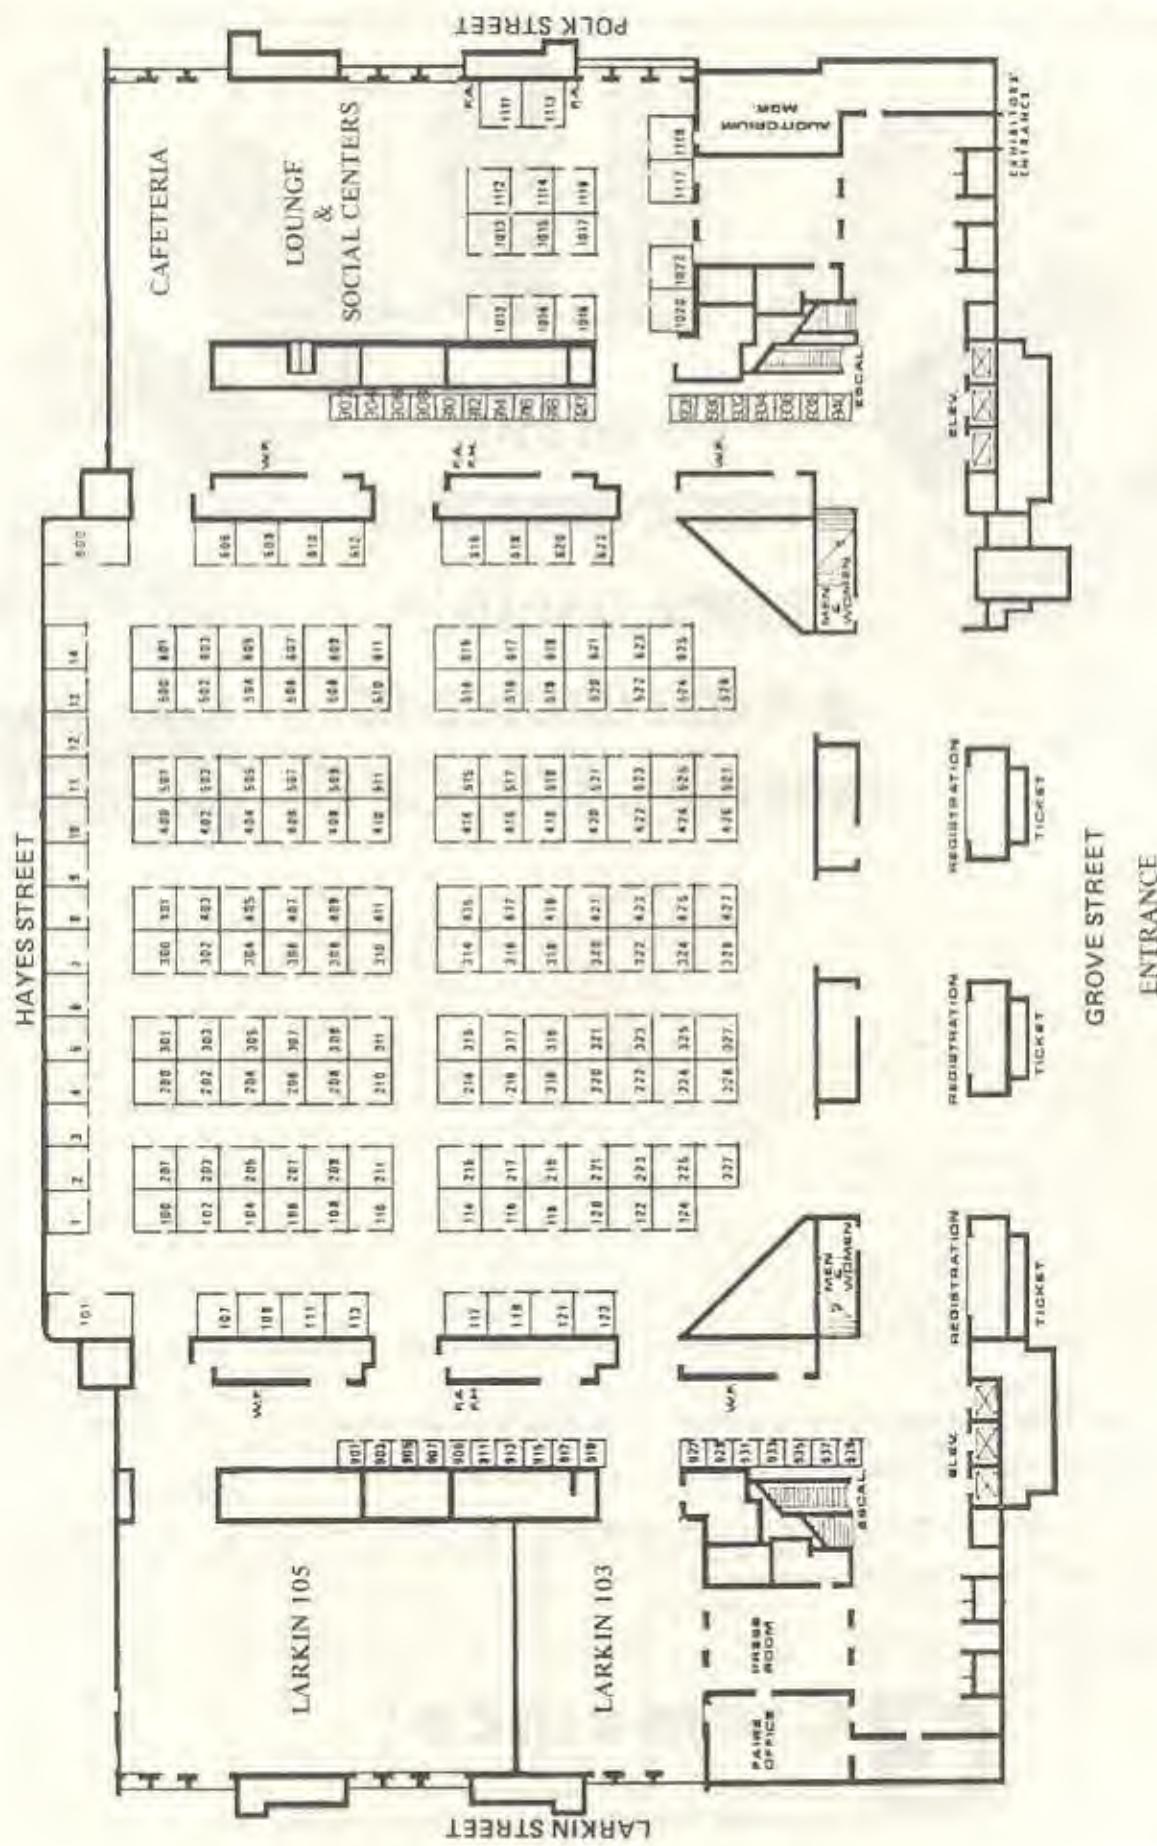

We wish you pleasure and success with your computer.

# Now. THE PERFECT MICROCOMPUTER

## TECHNICAL INFORMATION

The VECTOR 1 is an exceptionally versatile general purpose byte-oriented digital computer. It is based on the 808A Microprocessor and the common S-100 bus structure. The Intel 808A provided with the VECTOR 1 has 78 basic machine language instructions and a minimum instruction cycle of two microseconds. There is room for up to 64K of directly addressable memory using a parallel 8 bit word/16 bit address and 256 separate input and output devices can be addressed.

**It's a two touch affair**

# VECTOR 1

## DESIGN FEATURES

The VECTOR 1 incorporates improvements in mechanical, thermal, and electrical design compared to competitive computers. A mechanically rigid heavy .093" gauge cabinet retains its structural integrity even with the cover removed. A low noise level fan is standard, and cross ventilation uniformly cools each circuit board. The power supply components transfer their heat directly to the case bottom for cool operation. A line filter is provided to prevent transients on the power line from causing memory errors, a common problem.

NOT AFFILIATED WITH VECTOR GENERAL INC.

## EASE OF CONSTRUCTION

The mechanical assembly of the case and card guides is simplified through the use of special fasteners and snap together components. No sheet metal screws are used. By providing a system monitor program on PROM, several advantages are achieved: Wiring cables and unreliable front panel circuitry are eliminated allowing the 8080A MPU to operate as it was intended. The computer can load cassette tapes or communicate with a terminal through an I/O board as soon as the power is turned on, eliminating tedious loading of bootstraps with front panel switches. Since all of the electronic circuitry is on plug-in boards, trouble shooting is simplified.

## COMPATIBILITY

All of the current 8080A software is compatible with the VECTOR 1, with the exception of minor patches to the I/O routines, as are most boards for the S-100 bus.

## POWER SUPPLY

The 18A 8V and 2.5A  $\pm$  16V custom supply provides sufficient power for a full 18 boards. The transformer has a multiple tapped primary, all class B insulation and the 8V supply has a 150,000 mfd filter capacitor.

Starts at only \$349 plus you have a choice of cabinet color, rust or green. Write for more information.

# The Byte Shop reaches a new low in microcomputers.

The Byte-8. It doesn't have a nifty (and expensive) front panel with lots of LED's and toggle switches.

And we obviously don't have a big full-color ad.

What we do have is the lowest priced microcomputer you can buy—built around the powerful and popular 8080A microprocessor.

For \$349, you get the complete microcomputer card, motherboard, power supply and chassis in kit form.

The Byte-8 S100 bus is the same one used by Altair, IMSAI and most others so you have the greatest possible flexibility in choosing memory and input/output cards.

Optional cards from the Byte Shop in-

clude 4k, 8k or 16k of Random Access Memory, 4k or 8k of Programmable Read-Only Memory, a multiple input/output card, a TV typewriter card and, yes, a front panel bootstrap card, if you want the LED's and switches.

Even the CPU is optional. We'll sell you the chassis, motherboard and power supply for \$229, and you can choose your own microcomputer card—a ZPU for instance?

Byte-8. It's the new low in price, but we're aiming for a new high in flexibility, delivery and support. See the Byte-8 at your nearest Byte Shop.

**BYTE SHOP**  
the affordable computer store

Stores now open in **Arizona**, Phoenix; **Tempe**, **Tucson**; **California**, **Berkeley**, **Burbank**, **Carmel**, **Diablo Valley**, **Fresno**, **Hayward**, **Lawndale**, **Long Beach**, **Mountain View**, **Palo Alto**, **Pasadena**, **Placentia**, **Sacramento**, **San Diego**, **San Fernando Valley**, **San Francisco**, **Santa Barbara**, **Tarzana**, **Thousand Oaks**; **Westminster**; **Colorado**, **Arapahoe County**, **Boulder**, **Englewood**; **Florida**, **Orlando Beach**; **Miami**; **Indiana**, **Indianapolis**; **Minnesota**, **Eagan**, **Minneapolis/St. Paul**; **New York**, **Levittown**; **Oregon**, **Beaverton**; **Portland**; **Pennsylvania**, **Bryn Mawr**; **South Carolina**, **Columbia**; **Utah**, **Salt Lake City**; **Washington**, **Bellevue**; **Canada**, **Vancouver**; **Japan**, **Tokyo**. If there's no Byte Shop near you yet, please write or call Byte Inc., 1261 Birchwood Drive, Sunnyvale, California 94086 • (408) 734-9000 for more information on our Byte-8 system.
